Preco has extended the PreView™ family by offering the Standard PreView™ system, a smaller sized, compact design which is ideal for vehicles that are operate where safety and ruggedness is important, but space is a concern. The Standard PreView™ system is designed for on-road & light to medium duty off-road vehicles, commercial vehicles, Class 2-5 (Step-up vans, Utility vehicles, Delivery vehicles, and RV's), Class 7 & 8 vehicles, school buses, and other vehicles.

The Standard PreView™ system is built upon the existing PreView™ system strengths by offering:

**Compact, Rugged Design** – resistant to environmental conditions such as moisture, dust, vibration, heat, cold, sun glare and others. The system has been tested to comply with the SAE 1455 environmental specification and the system is CE and e certified.

**Simplicity** – the system contains only three components: sensor unit, in-cab display unit, and a cable connection the sensor unit to the in-cab display unit. Covering areas up to 20 ft./ 6 M.

**Flexibility** – the sensor can be mounted into a 4” grommet with an adaptor and the system can be integrated with a Preco backup alarm.

**Safety** – the system can help save lives. It can also prevent damage to vehicles caused by backing into static objects. The system is designed to detect the closest obstacle (whether static or moving, human or inanimate) in the area of coverage.

**Specifications:**
- Sensor unit dimensions: 5.25” circular, 1” deep
- In-cab display unit dimensions: 2 ¼” (w) x 2” (d) x 1” (h)
- Power requirements: 12v & 24v systems, < 200mA
- Connects to reverse lights for power
- Operating temperature range: -40°F to +185°F (-40°C to +85°C)

**Model Numbers:**
- SPV 2010 – up to 10 ft/ 3 M coverage
- SPV 2015 – up to 15 ft/ 5 M coverage
- SPV 2020 – up to 20 ft/ 6 M coverage
